Dear friends and colleagues,

we proudly announce the 3rd international symposium on coccyx disorders, to be held on June 24 and 25 next year in Munich.

After the very successful 1st and 2nd symposiums on coccyx disorders, held in 2016 (Paris/France) and 2018 (Dordrecht/Netherlands), the Algeiologikum Centres for Pain therapy now have the honour to host a third event in Munich—Coccyx 2020.

We have made much progress in understanding and treating painful coccyx conditions, but still, many things remain unclear. Too many patients are suffering from this special and complex pain syndrome and are not diagnosed and treated appropriately. They are passed on from one physician/ therapist to the next.

We will widen the focus on this matter and take an integrated approach to discuss the different ways to treat tailbone pain. Consequently we have entitled this symposium 'The coccyx and its neighbourhood'. We want to get a 360° perspective on this issue and come up with new solutions.

In the course of two days, many experts from very different medical sectors will present their work and share their expertise. Highlight of the programme will be a panel discussion. Based on a case report, 4 experts will discuss their different approaches in diagnosis and therapy, with the intent to provide a comprehensive picture of this special pain syndrome.

The congress will be held in one of the most beautiful locations in Munich, right next to the famous 'Englischer Garten'.

We are looking forward to welcoming you in Munich.

Best wishes,

Dr. Reinhard Thoma

Prof. Dr. Christine Schiessl
